Measure distance from reference points and mark guidelines to lay out work, using plumb bobs and levels.

Construct corners by fastening in plumb position a corner pole or building a corner pyramid of bricks, and filling in between the corners using a line from corner to corner to guide each course, or layer, of brick.

Apply and smooth mortar or other mixture over work surface.

Calculate angles and courses and determine vertical and horizontal alignment of courses.

Break or cut bricks, tiles, or blocks to size, using trowel edge, hammer, or power saw.
